PRODUCT CATALOG

BSTPL

ADVANCED AIS 140 GPS TRACKING DEVICE

The BSTPL is a reliable and intelligent GPS tracking device certified with AIS 140 standards, designed for real-time tracking, monitoring and data communication for fleet and public transport management.

**AIS 140
COMPLIANT**

**GOVERNMENT
APPROVED**

**REAL-TIME
TRACKING**

**RELIABLE
PERFORMANCE**

POWERFUL FEATURES

REAL-TIME TRACKING

Accurate location tracking with GPS for better visibility and control.

MULTI-NETWORK CONNECTIVITY

Seamless connectivity with GSM/GPRS for uninterrupted data transmission.

AIS 140 CERTIFIED

Compliant with AIS 140 standards for safety, security and regulatory requirements.

DATA LOGGING & STORAGE

Stores data securely and supports remote access for reports and analytics.

ALERTS & NOTIFICATIONS

Instant alerts for overspeeding, geo-fencing, ignition and other critical events.

RUGGED & RELIABLE

Built to withstand harsh environments for long-lasting performance.

IDEAL FOR A WIDE RANGE OF APPLICATIONS

PUBLIC TRANSPORT

FLEET MANAGEMENT

EMERGENCY SERVICES

SCHOOL TRANSPORT

CONSTRUCTION & MINING

LOGISTICS & SUPPLY CHAIN

KEY BENEFITS

REDUCE COSTS

Optimize operations and reduce fuel consumption.

IMPROVE EFFICIENCY

Enhance productivity with real-time insights and reports.

ENHANCE SAFETY

Ensure driver safety and compliance with AIS 140 norms.

REAL-TIME CONTROL

Monitor your fleet anytime, anywhere with live data.

ENVIRONMENT FRIENDLY

Reduce emissions and support sustainable operations.

CONNECT. MONITOR. OPTIMIZE.

All in One. Built for Tomorrow.

BSTPL brings intelligence to your fleet operations with reliable tracking, advanced analytics and complete compliance.

FMB120 GPS TRACKER

RELIABLE. VERSATILE. BUILT TO PERFORM.

The Teltonika FMB120 is a professional and compact GPS tracker with GNSS, GSM and Bluetooth connectivity, designed for a wide range of vehicle tracking and fleet management applications.

GNSS TRACKING

High-accuracy location tracking with GPS, GLONASS, Galileo, BeiDou and QZSS support.

GSM CONNECTIVITY

Reliable 2G network connectivity for real-time data transmission and remote management.

BLUETOOTH LE

Easy configuration and data transfer via Bluetooth Low Energy.

FLEXIBLE I/O

Multiple digital inputs, outputs, 1-Wire interfaces and analog input for versatile use.

INTERNAL BATTERY

Built-in 170 mAh battery for event logging and backup power.

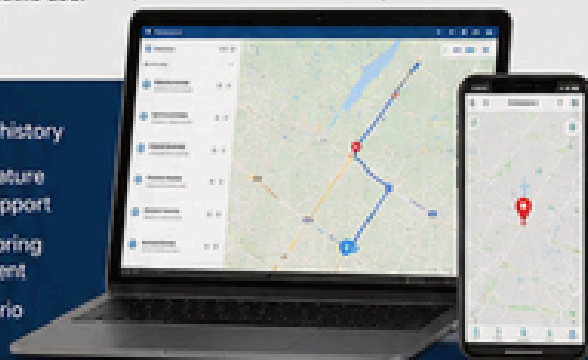

COMPACT DESIGN

Small and lightweight form factor for easy installation in any vehicle.

SMART FEATURES FOR SMARTER FLEETS

- ✓ Real-time tracking and monitoring
- ✓ Ignition detection
- ✓ Geofencing and alerts
- ✓ Overspeeding alerts
- ✓ Trip and route history
- ✓ 1-Wire temperature and iButton support
- ✓ Remote monitoring and management
- ✓ Multiple scenario automation

IDEAL FOR A WIDE RANGE OF APPLICATIONS
